

Lesson 13: Second Case Study

Case Study Objectives

This Case Study is based on a real implementation and is designed to test what you've learned in class. You should plan on this case study taking up to 8 hours. Because of the complexity of this study, you should have regular stopping points so that you can look back over previous lessons to double check your work and for a progress check.

Case Study Exercise

Your turn!!

Please pause this presentation and read business problem for the exercise and complete the case study.

After completing this Exercise please continue this course.

Case Study Overview

This Case Study was designed to allow you to build a BP and integrate the lessons you have learned over the course and apply them to the case to solve the issue that the business is having. After completing this case study please continue the presentation.
